

# Lollipop Lust Kill, Can't Get Away

Moving on without a care  
I always made them cry  
Untill I met the girl so fair  
Then my summertime died

Her lullaby a wicked one  
Fall asleep and die  
When she opens up her door  
You will go inside

{chorus}

She thrilled me, She killed me  
All with a bat of her eye  
She used me up and put me away  
I met her in my summertime  
And now I'm here to stay  
I can't get away

Cross her path and she will tempt you  
But don't believe the lie  
Her care for life has been exempted  
She'd rather watch you die

She's a creature of the cold  
Dead girl breathing dust  
Preying on the weak of soul  
Taking what she must

{Chorus}

I died in my summertime

Finger nails of razorblades  
Teeth of cold steel  
Body made in heaven  
And a mind that's straight from hell

{Chorus}
