

Lonewolf, Noctural Winds

A bird over the seascape, a firefly in the night
an eagle over the mountain, like an angel in the light

Bridge: We belong together, flying in the eternal height
flying through infinity, you and me

A dream made of feelings, of hopes and fantasies
it's your fantasy that frees you, that gives your soul release

Bridge

Refrain: As long as the winds are blowing - I'll be there for you
As long as the winds are blowing - I'll be loving you
As long as the winds keep blowing - I'll be at your side
As long as the winds are blowing through the night

The wind in the night, blowing like a flame
arousing all the stars, relieving your pain

Bridge Refrain
