

# Longpigs, Vagina Song

(spoken)

... song about biology  
and how it f\*\*ks up with love every now and then

The face you live in,  
it doesnt necessarily have to be yours  
pause for a minute  
forget your excuses  
and just like any other  
youve got no short stories  
it's cause for alarm  
well ive no eyes in my head

to see you there  
more than vagina you said  
and its lies lies lies in your head  
i need you more  
more than your vagina i said

may i mention  
may i suggest you expect to be happy  
with flaws, imperfection (in perfection?)  
what do i look like  
you're closing your eyes to all ready-made babies  
its yours for the taking  
well i've no eyes in my head

to see you there  
more than vagina you said  
and its lies lies lies in your head  
i need you more  
more than your vagina i said

listen is the father the son  
the hungry the ghost of all those

The face you live in  
it doesnt necessarily have to be yours  
pause for a minute  
forget your excuses  
and just like any other  
youve got no short stories  
it's cause for alarm  
well ive no eyes in my head

to see you there  
more than vagina you said  
and its lies lies lies in your head  
i need you more  
more than your vagina i said
