

Longwave, Make Me Whole

make me whole now
take me in
i want the new life to begin
in your arms i recognise your face
no redemption in the end
im so far gone im back again
you're on my knees i recognise your face
crush the world beneath your fist
kill yourself just to exist
deny the mystery that stays
waste a year
waste a year away
looking down i hang my head
looking in already dead
look at you i recognise my face
see the death i left behind
know the after life in time
no more emptiness
no more waste
smash the blackness with a screen
no one heres the sound it seems
tonight a permanence that stays
waste a year
waste a year away
pull your insides
pull your insides
pull your insides out
deny your lover
betray your other
redeem you from without
pull your insides
pull your insides out
make me whole now
take me in
i want the new life to begin
in your arms i recognise your face
loving this i pay a price
loving you i sacrifice
you're on my knees I recognise your face
crush the world beneath your fist
kill yourself just to exist
deny the mystery that stays
pull your insides out
pull your insides out
pull your insides out
pull your insides out
pull your insides
pull you insides out
