

Lor, Bye bye, Sun Francisco

I've spent too much time staring into the sun
I don't know where I've been I don't know what I've done
Everything around has turned into dust
It made me realize we were nothing in the past

Joe has a good life
One we dream about
I won't unpack
I won't come back

Please, stop the Earth from spinning around
Don't let the sun burn us all down
Now that it's up I feel it coming for us
tara tararara tara tarara

I don't have the time to talk about it now
But whenever I wake up I regret I'm being blind
Everyone around has turned into past
It's funny how I thought it will never come to us

Joe has a good life
One we won't have
Wishing you luck
I won't come back

Please, stop the Earth from spinning around
Don't let the sun burn us all down
Now that it's up I feel it coming for us
