

Loraine McFarland, Tired

Verse 1

Here I go and then once again
Rumors have already started
Nothing ever ends
And im getting a lil tired
Of the he said she said
I hate fake friends and
Sick of people tryin to tell me
What they think whats good and best for me
I just a need a lil room to breathe
Can you please respect my privacy
Why cant you leave me alone
Don't wanna be bothered
Of these childish things
Can't you understand why
I have problems of my own
Need to attend to
I'm gonna live my life

Chorus

I'm tired of rumors starting
Im sick of being followed
I'm tired people lying
Saying what they want about me
Why can't they back up off me
Why can't they let me live
Im gonna do it my way
Take this for just what it is

Verse 2

This is my final last warning
So you people better just step away from me
Before I get to angry
You won't know what hit
You'll be like "what";
I gotta say respectfully
I love it if you go, stay away from me
Everyone needs space to breathe
Can you please respect my privacy
Why cant you leave me alone
Don't wanna be bothered
Of these childish things
Can't you understand why
I have problems of my own
Need to attend to
I'm gonna live my life

Coda

I just need to free my mind
Just wanna dance and have a good time
