Lordi, The deaite girls gone wild

She lures you in with intention Looks like the girl next door

But it's blood and sticky floors

that really turn her on

She's got a body to die for

You touch it and you will

She's got a face of an angel

and an urge to kill

She's sanctified by death

Hey! Stay away from the lady night

Hey! Don't you mess with the devil's bride

You gotta pull out!

Can't you feel the darkness falling?

Get the hell out!

Can't you hear the heaven's roaring?

The Deadite girls gone wild

Have casket will travel

She's the best of the worst

She'll chew on your neckbone

to quench her thirst

The black widow entraps you

Oh boy, you're in for a treat

She's the queen of beasts

She's a demon in heat

She's sanctified by death

Hey! Stay away from the lady night

Hey! Don't you mess with the devil's bride

You gotta pull out!

Can't you feel the darkness falling?

Get the hell out!

Can't you hear the heaven's roaring?

The Deadite girls gone wild

[S010]

No, don't thank heaven for little girls, no

When their eyes turn white as pearls

You wanna put it inside

You're gonna lose it, she bites

Then she'll suck you dry

Then she'll suck you dry...

Hey! Stay away from the lady night

Hey! Don't you mess with the devil's bride

You gotta pull out!

Can't you feel the darkness falling?

Get the hell out!

Can't you hear the heaven's roaring?

The Deadite girls gone wild
