

Lost Frequencies, Dive - feat. Tom Gregory

I just can't get enough of all these summer skies
The sun it brings me up it gets me high
I could live in this moment for the rest of time
So stay a little longer my love
I just can't get enough of all these summer skies
They wash away the darkness from my mind
I could live in this moment for the rest of time
Oh my

I just wanna dive into your love, your love
dive into your love, your love
I just wanna dive into your love, your love
dive into your love, your love
I just wanna dive into your love

(Oh all the time)

I feel there's something coming over me
It's like a flash in my head
Right here with you is where I'm supposed to be
It's like coming home again

I just can't get enough of all these summer skies
The sun it brings me...
