

# Louise, In Walked Love

Once there were stars out in the night  
They never seem to shine  
And love was there for every heart  
Seemed for every heart but mine

That's how it seem to be  
Then darling you changed everything  
Just when i thought I'd given up  
Out walked loneliness

(Chorus)  
In walked love, in walked you  
In walked all my dreams, Coming true  
In walked love  
Right through my door  
I saw your face, then I knew  
All I looked for I had found in you  
I found the one that i'd been dreaming off  
In walked love

I threw my heart into the wind  
I'd throw my love away  
And love would never let me in  
And then you came my way

Just like a ray of light  
That breaks through the long cold night  
you brought in a brand new morning sun  
Out walked loneliness

(chorus)

Out walked loneliness

(Chorus to fade)
