

# Louise, Real Love

(by climie, noel and george)

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
(real love)  
This is real love

He can't leave me hanging on the edge like this  
Have mercy, I'm powerless against your kiss  
Only you can make my dreams reality  
I feel your sexuality  
I'm trembling inside  
(you know, you know)  
He cannot be denied

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Sweet angel must have been sent from heaven above  
Don't know how I lived before I found your love  
I just wanna celebrate the joy you bring to me  
Hope and pray you'll be my destiny  
And this flame will burn and burn eternally

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love  
Real love, real love, real love  
This is real love  
This is real love

Real love

My defenses are down  
Got me spinning around  
I'm standing my ground

My defenses are down  
Got me spinning around  
I'm standing my ground  
But there's no way out

Real love, real love, real love

Real love, real love, real love  
My defenses are down  
Got me spinning around

Real love, real love, real love  
This is real love  
Real love

Real love, real love, real love  
Real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love, real love, real love  
This is real love  
This is real love

Real love
