

Love, Robot, Go Get 'Um

I would never leave your side
Because after all this time
We loved and we fought
But there wasn't a moment where I thought
We'd ever be torn apart forever
Because, you and me just sounds much better together
And the glaze on your face
Makes it hard to replace
We will link our hands as I pick up the pace
I would never leave your side
Because after all this time
We loved and we fought,
We loved and we fought
I just don't understand
You're, the most amazing in this land
Stop moping around and letting life bring you down
I will lift your chin above
And I will fill your tears with love
I'm still missing all of the answers
If I, stop searching I will only fall faster
What is hidden here in this desolate sky?
I need, something to help me open up my eyes
I'm being exposed with nothing to hide
I hope I get what I am trying to find
I would never leave your side
Because after all this time
We loved and we fought,
But there wasn't a moment where I thought
We'd ever be torn apart forever
I just don't understand
You're, the most amazing in this land
Stop moping around and letting life bring you down
I will lift your chin above
And I will fill your tears with love
If it repeats how can it cease?
Will my mind ever be at peace?
Possibilities, insecurities
Possibilities, insecurities
We stop where we can't stand
Too scared to take a hand
Remorse for all we've done
One for all and all for one
I just don't understand
You're, the most amazing in this land
Stop moping around and letting life bring you down
I will lift your chin above
And I will fill your tears with love
I just don't understand
You're, the most amazing in this land
