

Lovex, Got what I came for

My body feels so light
My soul is anxious to bloom
I'm not special in any other way
I'm just ready for my doom
There's absolutely no way you can make me break
No way to wipe the smile off my face
Come take me anywhere
Come take what's left of me
I've already got what I came for
Don't get me wrong
I only pity those
Who haven't yet loved
There's absolutely no way you can make me break
No way to wipe the smile off my face
Come take me anywhere
Come take what's left of me
I've already got what I came for
Now what are you waiting for
It won't come to you
It's not inside yourself
Don't give up the faith
Get your love to reach your peace
To lose your fears
Now what are you waiting for
It won't come to you
It's not inside yourself
Take me anywhere
Come take what's left of me
I already got what I came for
