

LP, Switchblade

Do you remember making love on a hill at the top of Topanga
Do you remember a hands full of pills on a midnight adventure
I do /3x

Late in September it started to end and I felt you pretending
I couldn't surrender thru the high and the low I just wanted to love you
And I do
I do

All of the hurt you been hiding away
Cuts me at once like a switchblade
So take every stab you can take
And I'll give it to you it to you
I always knew that you'd cut me someday
I fell in love with a switchblade
And I know that you did the same
So I'll give it to you it to you

We were electric
We were wild
We were free
And I thought that you meant it
Hard to accept that it's not meant to be but I'll never regret it
I don't /4x

All of the hurt you been hiding away
Cuts me at once like a switchblade
So take every stab you can take
And I'll give it to you it to you
I always knew that you'd cut me someday
I fell in love with a switchblade
And I know that you did the same
So I'll give it to you it to you

Long live the beautiful hearts who find love
And tear it apart

All of the hurt you been hiding away
Cuts me at once like a switchblade
So take every stab you can take
And I'll give it to you it to you
I always knew that you'd cut me someday
I fell in love with a switchblade
And I know that you did the same
So I'll give it to you it to you
