

LP, When We're High

There was a time there was a life
I was inside my head
Then finally I rested in your bed
The bars the dives the words of vibes
I though had come to pass
But still I couldn't seem to make it last

I'd swallow the moon and stars
To follow the beat of your heart

When we're high
Oh my god
You blow my mind
So let's get high
Live until we die

You and I
Let's just do it one more time
A million times
So let's get high
Live until we die

A state of mind collected like
A slowly wound bouquet
With memories of our favorite nights and days

Let's swallow the moon and the stars
Let's wallow just right where we are

When we're high
Oh my god
You blow my mind
So let's get high
Live until we die

You and I
Let's just do it one more time
A million times
So let's get high
Live until we die

On my my kiss the sky
Jimmy baby you were right
She's so fine
Hips don't lie
Hit me one more time
Go ahead
And insert any random ass line
Go ahead
