

Lucas Prata, What's Your Name

I can't forget the other day
You smiled at me and walked away
I can't erase that pretty face
It feels like we were meant to be
I've been losing sleep at night
Never thought that i'd see you again
It's driving me insane
Baby would you tell me what's your name
Baby tell me what's your name
I gotta know everything about you girl
You know you're driving me insane
I can't believe i feel like this
bout someone i ain't even kissed
I think that i've been hypnotized
I can't get her off my mind
I've been losing sleep at night
Never thought that i'd see you again
It's driving me insane
Baby would you tell me what's your name
Baby tell me what's your name
I gotta know everything bout you girl
You know you're driving me insane
Baby tell me what's your name
Baby tell me what's your name
I gotta know everything bout you girl
You know you're driving me insane
Oh oh whoa oh whoa (x3)
Oh oh whoa
Never thought that i'd see you again
It's driving me insane
Baby would you tell me what's your name
Baby tell me what's your name
I gotta know everything bout you girl
You know you're driving me insane
