

# Lucinda Williams, Right In Time

Not a day goes by I don't think about you  
You left your mark on me it's permanent a tattoo  
Pierce the skin and the blood runs through  
Oh my baby  
The way you move it's right in time  
The way you move it's right in time  
It's right in time with me  
I stand over the stove in the kitchen  
Watch the water boil and I listen  
Turn off the television  
Oh my baby  
The way you move it's right in time  
The way you move it's right in time  
It's right in time with me

I take off my watch and my earrings  
My bracelets and everything  
Lie on my back and moan at the ceiling  
Oh my baby  
Think about you and that long ride  
I bite my nails I get weak inside  
Reach over and turn off the light  
Oh my baby  
The way you move it's right in time  
The way you move it's right in time  
It's right in time with me  
The way you move it's right in time  
The way you move it's right in time  
It's right in time with me
