

Lucinda Williams, Right In Time

Not a day goes by I don't think about you
You left your mark on me it's permanent a tattoo
Pierce the skin and the blood runs through

Oh my baby

The way you move it's right in time

The way you move it's right in time

It's right in time with me

I stand over the stove in the kitchen

Watch the water boil and I listen

Turn off the television

Oh my baby

The way you move it's right in time

The way you move it's right in time

It's right in time with me

I take off my watch and my earrings

My bracelets and everything

Lie on my back and moan at the ceiling

Oh my baby

Think about you and that long ride

I bite my nails I get weak inside

Reach over and turn off the light

Oh my baby

The way you move it's right in time

The way you move it's right in time

It's right in time with me

The way you move it's right in time

The way you move it's right in time

It's right in time with me
