

Lucky Dube, My Brother, My Enemy

Your smiling cannot fool me no more
Your sweet talking cannot fool me no more
Cause I know about your cheating
Cause I know about you back biting
And I don't know what you know
And I have never been where you've been
And I certainly don't believe in what you Believe in
And I don't do what you do I'm a living witness, now I know that...

Chorus

Not every black man is my brother
Not every white man is my enemy
I've got no place in your world
And I've never been where you've been
And I don't know what you know
And I have never been where you've been
And I certainly don't believe in what
You believe in
And I don't do what you do
I'm a living witness, now I know that...
Chorus till fade...
