Lucy Pearl, Good Love

Good love will make you cry Good love will last until you die

When I woke up this morning
Autumn leaves just pass me by
Saw this couple just crying
And in my mind I wonder why
I could tell it was special
'Cause something felt so true yeah
That's the thing about true love
That is the way I wanna be happy with you

Good love will make you cry Good love will last until you die

Now I'm speaking as a woman Raised with a mother's love She said you better recognize The truth from lies It's in the eyes Gotta look beyond what you see It's so much deeper that visually Let's come together just you and me Look and see through the trees The journey of

Good love will make you cry Good love will last until you die

Love can make you warm
Or it can make you very cold
If you listen to your heart
The truth will unfold
When you find that honey, honey
That touches you on sight
You should never fight that feeling
'Cause good love's so right

Good love will make you cry Good love will last until you die
