

Luke Temple, Make Right With You

When all goes sideways and all goes blue
That's the time to make right with you
Give up for angles give up for clues
That's the time to make right with you

When all of life's dragging me through
I've got to make right with you
Lord knows, lord knows I do

When power makes offers I pull back my hand
That's the time to make right with man
Give up position, give up command
That's the time to make right with man

In an hourglass draining its sand
I've got to make right with man
One thing you must understand
I've got to make right with man
Lord knows, lord knows I can

On a lonely highway, in a mountain fog
That was the time I made right with God
My car flipped sideways to avoid a rock
That was the time I made right with God

And if life is a drop in the pot
I've got to make right with God
One thing you know I must do
I've got to make right with you
Lord knows, lord knows I do

I've got to make right with God
To make right with God, to make right with you
