

Luna Halo, On My Way

Stay awake
I've fallen through the night
A bullet through the motion
A blanket of city lights today
I saw you on the train
With lovers lips he kissed your face
The fever was blinding
I've got to put you behind me

I'm on my way there's not a doubt in my mind
Make no mistake this time is passing by
Easing the pain these pills are treating me right
Temporarily insane but I will be just fine

In this place
I'll wait
Still frozen in time, the ticking of silence
only the strong survive they say
My silhouette remains
Faded remnants of the day
So scatter the ashes
Cause I'm moving through the past and

I'm on my way there's not a doubt in my mind
Make no mistake this time is passing by
Easing the pain these pills are treating me right
Temporarily insane but I will be just fine
