

# Lunik, So On

I've been there once in may  
I was breathing and some birds just flew away  
Mothers there closed the doors and windows  
took their children in  
Mind scientist "Doctor Spin"  
In his waiting-room those people just were  
breathing me in - and  
Doctor Spin asked me then  
"Is there something in the air tonight?"

So on and so on  
So on and so on  
What is wrong about me  
People are leaving around me  
They hate me - don't take me - just break me  
Life's going on

I came in this uncomfortable room  
dark and stuffy and with all  
these ugly pictures on the wall  
he looked at me and began  
Don't be afraid - my name is Paul  
I know everything about you  
You're the very cause of illness  
That's what a virus's got to do  
I think it's better you leave us  
Flu will leave us - too
