

# Mad Caddies, Distress

Heard my favorite song on the radio  
I get so tired that I just don't know  
Is my whole life coming down on me  
Or is my problem anxiety  
She said

Spent the last few days wide awake  
And I don't know how much more I can take  
I only have one life to live  
And I want to give it all I can

Even though there's something that I didn't do right  
We really want fatal fever got some feeling tonight

I want to know  
I wanna go  
I wanna take myself so far away  
I say night night time I'm gonna be your friend to know

Half past two I stepped into  
The place I want to be  
Oooh you might be to lay my head  
I'm just to trying to find some sleep  
Well it's been three days since I had a good meal  
I haven't been without a beer for four  
And I know when I wake up tomorrow yeah  
I gotta hope that I've got space for one more

I want to know  
I wanna go  
I wanna take myself so far away  
I say not this time I'm gonna be afraid to say

I want to know  
I wanna go  
I wanna take myself so far away  
I say not this time I'm gonna be a friend to say

I want to know  
I wanna go  
I wanna take myself so far away
