

# Mad Sin, Dangerzone

The ghosts of the past come haunting me  
I'm thinking about times that used to be

I past the park where i first got laid down by the canal  
Where i met my mates  
We were the kids of the wall town  
Misfits of society and it felt like no way out  
But we shouted it out proud

## CHORUS:

Smash down the world  
In the dangerzone  
Smash down the world  
And we were not alone  
I don't mind the pain and the sorrow  
Smash down the world  
In the dangerzone  
Smash down the world  
And we were not alone  
And i still don't mind the pain

Fighting, stealing, drinking and dealing  
To scared to shed a tear and show a feeling

We were young but we saw through your lies  
I raised the clenched fist with bloodshed eyes  
We were one for all and all against this world  
What ever happened back then, we still haven't turned into men

## CHORUS:

Just out for fun always hated your schools  
Chased by the cops never believed in your rules  
But what you are is what you get  
That's what my mother said
