

Mad Sin, Loco Toxico

the man in white says everything is cool
and if you don't trust us, your a fool
in the laboratories we know all the tricks
well i know that they don't know shit

well the laboratory blasted in a boring little town
in the wind that brought the cloud of loco toxico
the smell of death is in the air and there's nothing you can do
cuz were now infected and soon you will be too

have a nice day, it might be your last
have a nice day, can't escape the gas
have a nice day, it might be your last

loco toxico is in the air, and we're gonna get sick of it
well loco toxico is in the air, and they don't give a shit
loco toxico is in the air, we're gonna get sick of it
& i said loco toxico is in the air, and they don't give a shit

well the laboratory blasted in a boring little town
in the winds that brought the cloud of loco toxico
the smell of death is in the air and theres nothing you can do
cuz were now infected and soon you will be too

have a nice day, it might be your last
have a nice day, can't escape the gas
have a nice day, it might be your last

loco toxico is in the air, and we're gonna get sick of it
well i said loco toxico is in the air, and they don't give a shit
well loco toxico is in the air, we're gonna get sick of it
& i said loco toxico is in the air, and they don't give a shit

well the time was right, stores and restaurants are empty
emergency horns blasted through all the city
as the creature jumps from house to house
and slowly the world succumbs to its night

have a nice day, it might be your last
have a nice day, can't escape the gas
have a nice day, it might be your last

loco toxico is in the air, and we're gonna get sick of it
well i said loco toxico is in the air, and they don't give a shit
loco toxico is in the air, we're gonna get sick of it
well i said loco toxico is in the air, and they don't give a shit
well they don't give a shit
well well well well they don't give a shit
