Mad Skillz, Inherit the World

[Mad Skillz]

Rappers came with their styles and I left with their heads Their crews became victim of the body-snatchin dread The world is now mine, the world belongs to me I carefully planned the extinction of all wack MC's Now innocents must prepare for my slaughter My style will inherit the world, just like water Cover it like sauce, think about who lost Niggaz minds was the reason for the MC holocaust I'll be the first to admit, I'm on some next shit Two rappers stepped up and left bullemic, and anorexic I told humans I'd conquer and bomb shit Now I stand alone and take care of my continents A&R's used to ignore me (yep) realized I was nice Now it's no one left here to write my life story Ninety-five rappers shelled like pearls Hit by genocide, I inherited the world

Chorus: repeat 4X

Humanity gets crushed, with a style that's hard
