

Made On Earth, Embrace

into the past,
knowing you wan it,
gotta push the now aside,
and appreciate the summer lights,

but as the cold comes close,
embrace whats taking place,
every aspect around you,
learn to love what was ours,
and cherish every thing around you,

chorus: late at night,
i find myself inside your head,
this always ends in fire,
wheres my happy ending gone?

right her right now,
wanting to hold it,
and never let it fly away
never have to live another day,

and as the winter comes,
the air turns cold,
the warmth seems so far away,
we've gotta remember the past,
and let it fall like snow around us,
