

# Madonna, Time Stood Still

Despair, regret, and tenderness  
Is what I feel for you  
I loved you from the very start  
What else could I do

You read my mind, you made me cry  
Time stood still  
And now I know the reasons why  
Time stood still

Chorus:

Maybe you're the next best thing to happen  
All the things we might have been

A flame becomes a fading light  
That burns inside my heart  
And like a castle in the sand  
It had to fall apart

You made me laugh, you gave me hope  
It's over now  
Our happiness went up in smoke  
It's over now

(chorus, repeat)

(chorus, repeat)
