Magdalena Tul, Make Me Believe

I've been thinking about you all day Tryin' to silence my longing for you Tum down the lights It's one of those nights Those things you're doing it's just right on track

Feel your fingertips on my neck flashing that love making-move - look in your eyes Now here I go - losing control Ripping your shirt dragging my nails down your back

Baby the night's still young
Two of us one on one
Tangled and twisted - yeah I'm addicted - begging you please
Lost in a world unknown
Broken and on my own
I'd all but given up - never finding love - now look at us
I'm down on my knees
Baby you make me believe

God knows I've hit behing a wall Building this barricade of doubt -brick by brick You came around - knocking it down Turin' my key, climbing inside with your kiss

Baby the night's still young
Two of us one on one
Tangled and twisted - yeah I'm addicted - begging you please
Lost in a world unknown - broken and on my own
I'd all but given up - never finding love - now look at us
I'm down on my knees
Baby you make me believe

Lost in a world unknown
Broken and on my own
I'd all but given up - never finding love - now look at us
I'm down on my knees
Baby you make me believe
I'd all but given up - ever finding love - now look at us
I'm down on my knees
Baby you make me believe
