Magnet, Home Song

Well the place where I come from, it seems light years from here But the sun though wouldn't know, it never shines there & Description of the small town, it's always full of small talk So rumors grow to tumors before they've learn't to walk

But all the while I'm gone, I'm gonna hum this home song

Well the place where I belong leave's an afterglow so strong It's moving through me now, although I've moved away I guess I'm just a little homesick, I am from time to time I don't think about it often, I don't like to waste my time

But all the while I'm gone, I'm gonna hum this home song
