

# Magnum, Captain America

The scarlet witch ain't going to help you tonight  
The human torch has gone and put out his light  
The god of thunder that we all know as Thor  
Has lost his hammer and is feeling quite sore

Where is the star man to help all his friends?  
He can't be back 'cause his fight never ends

Black eagle seems that he will sure get his way  
I feel concerned about the usa  
The iceman has melted and the angel has flown  
But are we going to fight this villain alone

Where is the star man to help all his friends?  
He can't be back 'cause his fight never ends

Pack up your money, move right away  
My king is coming, he's arriving today  
He can attract america when he likes  
Black Panther doesn't have the strength or the mite

Hold on a minute, what is this that I can see?  
Captain america is all right by me  
We got no worries now I know he's all right  
I feel much better now that I sleep at night

Here comes the star man to help all his friends  
I knew he'd come or the books would just end

Here comes the star man to help all his friends  
I knew he'd come or the books would just end  
Here comes the star man to help all his friends  
I knew he'd come or the books would just end
