

Magnum, It's Time To Come Together

Don't seem to get too far with anger and pain
We just start over and do it again
No matter who we are, we're all the same
Different religion by some other name

It's time to come together
Let's talk man to man
It's time to come together
But we don't give a damn

Know where you're going to, know where you've been
Sometimes it's crazy and you won't get in
We seem to talk a lot with nothing to say
Always tomorrow seems so far away

It's time to come together
Let's talk man to man
It's time to come together
But we don't give a damn

It's time to come together
Things change far too fast
It's time to come together
We've got to make it last

Don't seem to get too far with anger and pain
We just start over and do it again
No matter who we are, we're all the same
Different religion by some other name

It's time to come together
Let's talk man to man
It's time to come together
But we don't give a damn

It's time to come together
Things change far too fast
It's time to come together
We've got to make it last
