

Magnum, Matter Of Survival

A matter of survival, that we're apart
That's all we live and die for
I wish someone would tell it to your heart

So scared when I walk to your door, I saw you turn out the light
I can't take this hurt any more, I shout it out to the night
Living without you ain't living at all, tell me how do I get by?

It's a matter of survival
A matter of survival, that we're apart
That's all we live and die for
I wish someone would tell it to your heart

I walk the streets in the night
I feel your spirit deep inside
It comes with the darkness, stays till the light
I got to face it, there's nowhere to hide

It's a matter of survival
A matter of survival, that we're apart
That's all we live and die for
I wish someone would tell it to your heart
