

# Magnum, Matter Of Survival

A matter of survival, that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart

So scared when I walk to your door, I saw you turn out the light  
I can't take this hurt any more, I shout it out to the night  
Living without you ain't living at all, tell me how do I get by?

It's a matter of survival  
A matter of survival, that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart

I walk the streets in the night  
I feel your spirit deep inside  
It comes with the darkness, stays till the light  
I got to face it, there's nowhere to hide

It's a matter of survival  
A matter of survival, that we're apart  
That's all we live and die for  
I wish someone would tell it to your heart
