

Magnum, Start Talking Love

Just another broken heart, any fool can see
Though we're living worlds apart, you're still next to me
I'm never going to give you up, never want to make you cry
Never going to give you up, never going to say goodbye

It's just another lonely night, I'm missing you again
Nothing ever turns out right, so when's it going to end?
I'm never going to give you up, never want to make you cry
Never going to give you up, I'm never going to say goodbye

When you start talking love
You know that I'd run through the night
To be with you - talk about love
It's a walk from the dark to the light
To be with you - start talking love
Talk about love

You left me with a broken heart, any fool can see
Now we're living worlds apart, guess it was meant to be
I'm never going to give you up, I never want to make you cry
Never going to give you up, I'm never going to say goodbye

When you start talking love
You know that I'd run through the night
To be with you - talk about love
It's a walk from the dark to the light
To be with you - start talking love
Talk about love
