

Magnus Carlsson, Name of love

Like a gentling breeze from the wild and Roman sea
You caress my hand my conviction is so clear
Baby when I hold you near never to let you go
I've reached to point of no return tonight I'll show what I'm learning
How my heart yearns

refrain:

Let me shout in the name of love
Raising my hands to the sky above
(In the name of love, the name of love)
'Cross the seas, over time and space
I'll be by your side till the end of day
(Till the end of day)

I used to feel so insecure
Put a lock on every door
Till you came my way
Now finally I understand
I hold the future in my hand
As waves rush to land

refrain

All my love is shining through
'N every breath I take, every smile I make
Shining bright and true on you
Let me shout in the name of love
Raising my hands to the sky above
(In the name of love, the name of love)
'Cross the seas, over time and space
I'll be by your side till the end of day
(Till the end of day)

(You're the only one in my life)
Shout in the name of love
In the name of love
Shouting out in the name
Oh, in the name of love
Oh, in the name of love
I'm shouting out loud in the name of love!
