

MAJESTICA , Rising Tide

We have heard about it
A tale they say is true
Far away the spring lies waiting for you

We can't all ignore that years go by for me and you
No way to stay young they always say
No younger ladies dare to dance the night away
A fountain far away might bring back the times
Of younger days

Under stars at night across the sea we sail forever more
To the foreign land we go and never die
Lighting strikes when we're approaching to what we've been looking for
Take a drink and then be strong and young with pride
To sail the rising tide

When the deed is done we're heading back
To show the world what we have found
Spinsters waiting we'll bring the action to you
Grey-haired brutes with women's looks is all that we can get
And it leads to anguish
Horror liberate us from our wrongs
Come join our banquet over night with floating ale
With hardship we accept but tomorrow it ends
When we set our sail

Under stars at night across the sea we sail forever more
To the foreign land we go and never die
Lighting strikes when we're approaching to what we've been looking for
Take a drink and then be strong and young with pride
To sail the rising tide

Blind leads the blind tonight
But we stand here together as one
When our quest begins!

We have gone
Far away from home
And we know where to go
But the star shine above brings us hope
Of finding the way!

Under stars at night across the sea we sail forever more
To the foreign land we go and never die
Lighting strikes when we're approaching to what we've been looking for
Take a drink and then be strong and young with pride

Under stars at night across the sea we sail forever more
To the foreign land we go and never die
Lighting strikes when we're approaching to what we've been looking for
Take a drink and then be strong and young with pride
To sail the rising tide
