Major Lazer, Blow that Smoke (feat. Tove Lo)

blow the smoke darkness bring out our emotions mix em up with the night life potions I loose my head for you countless times we catch the sunrise fix em scars we share with white lies o loose my head for you

I got the keys to heaven now baes all around and they got my mind spinning suddenly doors just open wide

blow the smoke and let me love that fire I don't need no memories need is broken now I;, floating higher this madness so good for me

so good for me

pretty pictures keep me dreaming I loose my had for you livin big but still deceiving I loose my had for you I;m in deep and I don't mind I want that moment one of a kind

I got the keys to heaven now baes all around and they got my mind spinning suddenly doors just open wide
