

Malcolm Middleton, Somebody Loves You

Come here
Before I go away again
There's something I'd like you to hear

Somebody loves you
And I know who it is
A million dollar answer
If you're up for the quiz
Close your eyes
Spin around you're done
It's me you're after
I am the one
I am the one

Come here
Before I go away again
There's something I'd like you to hear

The devil deals the cards out
He's all hearts and queens
Even an idiot
Knows what this means
There's never enough blood
For the heart and the head
A world is rocked
Without a word being said
A word being said

Listen here
The mid October sun and I
Have never seen eye to eye

A little yellow flower
a little ball of flame
a slow walk up a steep hill
And I'm in love again
A stranger sky
I've never seen
In a stranger's eyes is
Where you've always been
And you'll always be
