

Man, Love Can Find A Way

So you think you're pretty swell my friend
You must have known our time would come to an end
People always have to wait just to see
If parting brings the opportunity
To live life, only, no strife
Love can find a way
Let it in to stay
We can find a way of loving

You have kept me waiting such a long, long time
I'm getting fed up with your ever-changing line
The lies you tell so well have turned me upside-down
You make the world believe I'm just a foolish clown
Who lives life, only, so lonely
Love can find a way
Let it in to stay
We can find a way of loving

Love can find a way
Don't let it slip away
We can find a way of loving

Love can find a way
Let it in to stay
We can find a way

So you think you're pretty swell my friend
You must have known our time would come to an end
People always have to wait just to see
If parting brings the opportunity
To live life, only, no strife
Love can find a way
Let me in to stay
I can find a way of loving

Love can find a way
Don't let it slip away
We can find a way of loving, loving
