

Marc Almond, Deep Night

Lately I've been having dreams
Strange kind of dreams
Beautiful dreams
In the deep night
Sleep, an uneasy sleep
The real and the unreal
Hallucinations creep upon me

Deep night
In the deep night

Take a walk on the street
And the heat is making the neon swim
In the deep night
Police cars and sirens
Explosions and light
Sounds of passion
Guns and love
In the deep night

Deep night
In the deep night

I'll follow the moon
Over the hill where
Tomorrow still sleeps
The sky full of pearls
The streets full of girls
Who will understand

In the deep night

Lately I've been having dreams
Strange kind of dreams
Beautiful dreams
In the deep night

This night will never be through
Until someone can fill my time
And make me forget
The dreams I dream of you
I'm wishing each kiss was mine
And desire

Deep night
In the deep night

There's love in the motion
Love in the sound
Of the deep night
If love was an ocean
I would be drowned
In the deep night

I'm dreaming of being in love

Hold me in your arms
Hold me tight
I'm afraid of the dark
And the deep night
