

Marc Anthony, When The Night Is Over

When The Night Is Over
Will we still feel ecstasy
We could make it through together
When The Night Is Over
Will you still be here with me
C'mon let's make it last forever
Loving you might be wrong but it feels so right
I just wanna let you know I don't wanna let you go not tonight
'Cause this feeling that I have for you is something more than words can say
So please stay with me, please stay with me
When The Night Is Over
Will we still feel ecstasy
We could make it through together
When The Night Is Over
Will you still be here with me
C'mon let's make it last forever
I don't care what people say
I just wanna be with you night and day
Oh girl you make me feel brand new
That's why I wanna stay forever here with you
'Cause this feeling that I have for you is something more than words can say
So please stay with me, please stay with me
So now that I opened up my heart to you won't you tell me that you feel the same
And now that you know my love is real
Please stay with me, please stay with me
When The Night Is Over
Will we still feel ecstasy
We could make it through together
When The Night Is Over
Will you still be here with me
C'mon let's make it last forever
When The Night Is Over
Will we still feel ecstasy
We could make it through together
When The Night Is Over
Will you still be here with me
C'mon let's make it last forever
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
When The Night Is Over will you feel the same for me
When The Night Is Over will you still feel ecstasy
