

Marc Bolan, Saturday Night

I went down to your place baby
On a Saturday night
Everyone we knew was there
But you were out of sight
There was Neon Henry
With the flashing head
I knew him well
But any place is outer space
Without my girl
And I'm singing

I went down to your place baby
On a Saturday night
Everyone we knew was there
But you were out of sight

There was pig-face Kim
I knew her well
But where were you &
Everyone we knew was there
But without you there seemed so few
And I'm singing

Repeat first two verses to fade....
