

Marco Borsato, Afscheid (English Version)

Very time together, my arms around you waist
My biggest love ever, I knew it from start
The last weeks, the days went fast
Closer comes the farewell, and it's going to be hard

Tell me you don't have to go baby
Tell me you don't have enough of me
Tell me you don't have to go baby
But you have to
If I just had one moment, I would spend another night with you
I would tell you I'd be waiting for you
En the future is smiling at us
And I would tell you over and over
I don't want anybody else

The bags are already outside, the trunk closes
The final long kiss in the early morning
You look at me and give me a big hug
I whisper in your ear I never forget you

Tell me you don't have to go baby
Tell me you don't have enough of me
Tell me you don't have to go baby
But you have to
If I just had one moment, I would spend another night with you
I would tell you I'd be waiting for you
En the future is smiling at us
And I would tell you over and over
I don't want anybody else

Never will I feel what I felt for you again
I hope I can live without you
So go now, wipe your tears away
And always remember I love you
