Margaret, What You Do

I, I've been looking for a while Been searching for a sign Enjoying to ignite

I, I've been chasseing highs and lows But don't know where to go It's could be a bumpy ride

When you feel other way What you do? What you do? Fade away Hate to say So what you do? What you do?

Raise it up lighter, lighter Dare it up higher, higher When you feel other way What you do? What you do?

(What you do?) What you do?) What you do? What you do? (What you do?) What you do?)

You, you don't wanna be alone Hiding in a safety zone Tell my what is on your mind

When your head is in the clouds Watch you hang out And be proud So come one and light the stars

When you feel other way What you do? What you do? Fade away Hate to say So what you do? What you do?

Raise it up lighter, lighter Dare it up higher, higher When you feel other way What you do? What you do?

(What you do?) What you do?) What you do? What you do? (What you do?) What you do?)

Look at me Look at me I want for you make your dreams If you wanna it, you take it .. how the lullaby singin': Aaaa! When you feel other way What you do? What you do? Fade away Hate to say So what you do? What you do?

Raise it up lighter, lighter Dare it up higher, higher When you feel other way What you do? What you do?

What you do? What you do?
