Maria McKee, Breathe

At first I was scared
When I opened up my head
And the motor that was runnin' Was the mind of you
I was scared when I looked at my reflection
And the shine I saw
Were the eyes of you
I was scared when you touched my lips
And the breath that I took
Was a breath that shook me with a shock
Like a flame
As eternal as a song
And the song is you and I

I will let you breathe through me
I will let you be with me

Whenever I'm alone
And you're lost out there
I can feel you breathe
'Cause our lungs we share
When I'm alone
Anytime, Anywhere
I can feel your heart beat
'Cause our blood we share
I was scared when you came into my room
The walls became the sea
Your voice was the moon
Oh, when you rocked me in your arms
Like a song, a wave on the tide of your and I

I will let you breathe through me
I will let you be with me

My heart beats your blood,
Your breath fills my lungs
Your heart beats my blood,
My breath fills your lungs
I was scared when you came into my room
The walls became the sea
Your voice was the moon
Oh, when you rocked me in your arms
Be with me...

I will let you breathe through me
I will let you...
I will let you...
I will let you...
