

# Maria, Simplified

It's more than chemistry, I feel  
Just the thought of you's surreal  
Should I be afraid to feel this way  
Knowing that my heart revealed

I keep thinking we're two of a kind  
I've given you the sign  
I can't make it any more simplified

'Cause I wanna love you, baby  
No one else will do, can I  
Only love you, and no one else

See, I won't hesitate or doubt  
With you, I've been blessed somehow  
It's like dj vu, feels so right with you  
Just seem to know what I'm about

When it's getting hard to breath  
I know the only remedy  
Nothing seems complicated  
Don't even have to say it  
You already know what I mean

I know you're feeling me  
Can't make it more simplified
