Maria, Simplified

It's more than chemistry, I feel Just the thought of you's surreal Should I be afraid to feel this way Knowing that my heart revealed

I keep thinking we're two of a kind I've given you the sign I can't make it any more simplified

'Cause I wanna love you, baby No one else will do, can I Only love you, and no one else

See, I won't hesitate or doubt With you, I've been blessed somehow It's like dj vu, feels so right with you Just seem to know what I'm about

When it's getting hard to breath I know the only remedy Nothing seems complicated Don't even have to say it You already know what I mean

I know you're feeling me Can't make it more simplified
