

# Marilyn Manson, Nod If You Understand

I need destruction  
I want towers to crumble  
Mothers tossing babies from the windows above

Who would wanna wake up if this is their world  
Who would wanna wake up if this is their world

I need destruction  
I want towers to crumble  
Mothers tossing babies from the windows above

Who would wanna wake up if this is their world  
Who would wanna wake up if this is their world

I won't repent  
This is what I was sent here for  
No reason to ask forgiveness  
Pain is the language that was spoken to me  
And now it's my time to answer

Look at yourself for someone to blame  
You're the only one who should be ashamed

Look at yourself for someone to blame  
You're the only one who should be ashamed

Stand in your lie  
I'm a bomb in your building  
No mercy  
No pity  
I don't care who survives

I'm a mistake that you can't unmake  
Nod if you understand

I won't repent  
This is what I was sent here for  
No reason to ask forgiveness  
Pain is the language that was spoken to me  
Now it's my time to answer

Look at yourself for someone to blame  
You're the only one who should be ashamed

Look at yourself for someone to blame  
You're the only one who should be ashamed

You're the only one who should be ashamed  
You're the only one who should be ashamed

Shame  
Shame  
Shame  
Shame

Shame  
Shame  
Shame  
Shame

We've been washing the floors of the slaughterhouse with buckets of dirty water

I won't repent  
This is what I was sent here for

I won't repent  
This is what I was sent here for

I won't repent  
This is what I was sent here for

I won't repent  
This is why I was sent

Look at yourself for someone to blame  
You're the only one who should be ashamed

Look at yourself for someone to blame  
You're the only one who should be ashamed

You're the only one who should be ashamed  
You're the only one who should be ashamed

No  
No  
No  
No  
I won't repent

No  
No  
No  
No  
I won't repent

I won't repent  
I won't repent  
I won't repent  
I won't repent
