

Mario, I miss my friend

Home alone I can't get no sleep
A Martin marathon's on tv
And Cole is funny but there's no one here
To laugh but me
And it really hurts cause girl you should be
Sitting with your head in my lap watching
And it's gotten to the point
I can't even enjoy nothing without you
I miss the laughter
And the nights we talked til dawn
The morning afters
Holding you inside my arms
And the sound when we be making love
And the passion that we thought would never end
But most of all I miss my friend
Driving in my car up some street
With no one in the passenger seat
And no one to fight with me
Bout what station is playing
And Kelly Clarkson's on the radio
I'm so sick cause we can't fight no more
And though I hate this song
I can't help but sing along
It's the closest thing I have to you
I miss the laughter
And the nights we talked til dawn
The morning afters
Holding you inside my arms
And the sound when we be making love
And the passion that we thought would never end
But most of all I miss my friend
And even though the love we had is gone
I'll still remember the good times
While I live my life yours will go on
Yes time will pass
But the love we had will last
I miss you baby
I miss the laughter
And the nights we talked til dawn
The morning afters
Holding you inside my arms
And the sound when we be making love
And the passion that we thought would never end
But most of all I miss my friend
(repeat once)
